2014	Matriculation (10th Grade)	Delhi Public School, Amritsar (Punjab)   CBSE	9.4 GPA out of 10

Professional Experience

SimbaQuartz

-Software Development Engineer- remote (June 2020 - present)

-Software Development Intern (December 2019 - June 2020)

-Remote Intern (April 2017- December 2019)

Projects

1.

**Zeus- SaaS Product (USA)** | *Frontend Architect and Developer @ SimbaQuartz* | **Web Development & DevOps** | *Live in Production (July 2019 - Ongoing)*  
A cloud-based quote management tool to achieve operational excellence. Role included setting up architecture, making decisions and executing them, developing it, leading the team of developers, with high-quality coding guidelines, executing the sprints to achieve the product launch within 7 months.  
**Tech Stack** - ReactJS | NodeJS | Firebase | Ofbiz | Solr| Apache Server | PostgreSQL | Jenkins
2.

**Fidelis ZEUS Mobile App (USA)** | *SimbaQuartz* | iOS/Android App Development | *Live in Production* (Apr 2018 - June 2019)  
This is a Cross-Platform Mobile Application, delivering FIDELIS Inc. to manage their quotations. This app manages the tasks, events, and consumes REST APIs, which are developed under the OfBiz Framework.  
**Tech Stack** - React-Native-Redux | Framework
3.

**Smiles.Care Administrator (India)** *Lead Developer* | *Smiles.Care* | Web Development | *Live in Production* | *Volunteered* (May 2018 - Jan 2019)  
Built **end-to-end** Project for an NGO focused to achieve `No Barefoot Children` status in India. This project allows the NGO to *manage donations, manage campaigns, manage surveys*.  
**Tech Stack** -ReactJS-UmiJS-DVA | NodeJS/ExpressJS | Firebase
4.

**Mobile Precision Irrigation System (India)** *R&D Student* | *Thapar Institute* | **Complete** | IOT Development | (*Details*) (Jan 2019 - Dec 2019)  
This project focuses on collecting the essential soil data, using AI-based Robotic Buggy. The data will then be used by the Analysts to generate a modal, which will help to calculate the precise amount of water required by the crop and different points, within a certain radius. (*Video Link*)  
**Tech Stack** - RaspberryPI | React-Native | NodeJS | FireBase
5.

**EveryStream Mobile App (USA)** **Full Stack Engineer**| *SimbaQuartz* | iOS/Android App Development (Apr 2018 - Nov 2018)  
iOS/Android Mobile App that allows users to multicast/simulcast live videos to different video streaming platforms like YouTube, Facebook, and Twitch.  
**Tech Stack** - FFMpeg | React-Native | NodeJS | FireBase | Red5Pro API
6.

**Jobwards (USA/UK)** **Full Stack Engineer** | *Philance* | Web Development (May 2018 - Aug 2019)  
Jobwards was an AI-enabled online jobs marketplace for employers looking to increase diversity and inclusion in their workforce and employers are assured of getting qualified job applicants. My role was to develop an initial MVP, which included rapid development using the following stack.  
**Tech Stack** - ReactJS-Redux | NodeJS/ExpressJS | Socket.io | MySQL | Jenkins
